As the Receivables Trustee has indicated that it would accept such an offer, the following tables set out on pages 27 to 29 summarise the pro forma numbers of the Securitised Portfolio as if the Proposed Addition had taken place prior to 31 March 2015 and Receivables outstanding on the additional designated accounts on that date had formed part of Trust Property.

(3) Recoveries are amounts received on previously charged-off principal receivables.  
(4) Net Losses are Gross Losses minus Recoveries.  
(5) All ratios are annualised

All ratios are annualised by multiplying by the following ratio: 365 divided by the number of days in the reported period.

## STATIC POOL DATA

The following tables present yield, net charge off, delinquencies, principal payment rate, total payment rate, Principal Receivables balance and total Receivables balance for Receivables included in the Securitised Portfolio since the incorporation of the Penarth Receivables Trust in October 2008. In each case, the information is organised by calendar year of account origination ("**Year of Account Origination**") for each monthly period.

The data up to October 2010 relates to Receivables originated by Bank of Scotland only. In November 2010, £2.9 billion of Receivables originated by Lloyds Bank were added to the Penarth Receivables Trust, and data from November 2010 reflects the combined Bank of Scotland and Lloyds Bank Receivables in the Penarth Receivables Trust.

Yield from finance charges and fees includes interest income, late fees, forex fees, credit insurance, card protection insurance, overlimit fees, cash advance fees, ATM fees, balance transfer fees and other fees related to credit cards. The yield percentage for each monthly period is calculated by dividing the sum of finance charges, fees and interchange during each monthly period by the Principal Receivables balance as of the beginning of the monthly period, then annualised by dividing the result by the number of days in each monthly period and multiplying by the number of days in the calendar year.

Volatility in the yield percentage is driven primarily by variations in the number of collection days during the performance period; the more collection days there are, the higher the value of payments received, and the higher the reported yield.

The yield during the first 24 months post account origination is low due to the introductory annual percentage rate ("APR") offers at account origination which typically offer 0% on balance transfers and/or purchases during the first 9-24 months. This trend is evident in the yields reported in the first few performance periods for accounts originated in each year from 2009 onwards.

Pre-2004 the operating environment in the UK for credit cards issuers was less competitive, and Lloyds Banking Group's acquisition strategy for the Lloyds portfolio had initial APRs at account origination which were typically higher; accordingly, the pre-2004 vintages have a slightly higher yield compared with the post-2004 vintages. The originators believe that the differential margin in yield compared to post-2004 vintages is reducing as Lloyds Banking Group's risk-based re-pricing strategy across the portfolio results in the convergence of yield over time.

In July 2007, Lloyds launched the Airmiles Duo card, taking over the Airmiles relationship from National Westminster Bank plc ("NatWest"). This product rewards credit card spend with Airmiles, and attracts a

higher proportion of convenience users who are less likely to revolve a balance on an account and attract interest charges. Yield on the Lloyds originated accounts from 2007 is therefore lower than accounts originated in years prior to 2007.

Following the initial addition of £2.9 billion of Lloyds Receivables to the Penarth Receivables Trust in November 2010, overall yield for the Penarth Receivables Trust has increased, driven by higher payment rates and so have the Finance Charge Collections on the Lloyds portfolio relative to the Bank of Scotland portfolio.

Yield on accounts acquired since 2010 is lower than for previous years as a result of an improvement in the quality of new accounts acquired in these years compared to previous years. This is driven by a combination of management actions to improve underwriting, a higher concentration of full payers acquired on the reward products offered by Lloyds, and a general improvement in the macro environment.

Net losses for a performance period is calculated as Principal Receivables charged off during the performance period less recoveries received on previously charged off accounts during the performance period, all divided by the Principal Receivables balance as of the beginning of the performance period, then annualised by dividing the result by the number of days in the performance period and multiplying by the number of days in the calendar year.

Net losses during 2008 and the first few months of 2009 are lower due to the initial selection criteria for new Receivables added to the Penarth Receivables Trust which excluded accounts in the later stages of delinquency. This seasoning impact is evident in November 2010 when £2.9 billion of Lloyds Receivables were added to the Penarth Receivables Trust resulting in reduced net losses; the originators expect net losses to continue to improve in the short term as risk selection criteria remains robust.

The higher charge offs on accounts originated pre-2004 is due to Bank of Scotland originating accounts above-market volumes during 2002 and 2003 in line with Bank of Scotland's market growth strategy at the time. Since 2004, acquisition and underwriting strategies have been reviewed and substantially revised. In accordance with this revised strategy, Lloyds Banking Group has taken significant steps to reduce its acquisition of accounts, and exposure to existing accounts, in the higher risk segments of the credit cards market.

In 2008 during the economic market dislocation, there was an industry-wide deterioration in the quality of business acquired. Lloyds Banking Group undertook significant de-risking in response, with tighter cut-offs reducing volume and lower initial credit lines. This activity was undertaken in the second half of 2008 and into 2009. The originators believe that this has resulted in a significant improvement in the credit quality of accounts originated in since 2009.

Net charge offs in August 2013, January 2014, May 2014, July 2014, August 2014 and December 2014 are negative for some vintages and below trend for others. This is due to the sale of previously charged off accounts to a third party whereby the proceeds from the sale were recorded as recoveries in the month.

Delinquencies include both Principal Receivables and Finance Charge Receivables. The 30+ days delinquency percentage for a performance period is calculated as total receivables 30 days or more past due divided by total Principal Receivables and Finance Charge Receivables as of the last day of the performance period.

Delinquencies during 2008 and the first few months of 2009 are lower due to the initial selection criteria for new Receivables added to the Penarth Receivables Trust which excluded accounts in the later stages of delinquency. This seasoning impact is evident in November 2010 when £2.9 billion of Lloyds Receivables were added to the Penarth Receivables Trust resulting in reduced net losses; the originators expect net losses to continue to improve in the short term as risk selection criteria remains robust.

In 2008, in response to the deteriorating economic environment, Lloyds Banking Group undertook significant de-risking of its portfolio, with credit lines of higher risk customers reduced and tighter cut-offs and lower initial credit lines improving the quality of new account acquisitions. This activity was undertaken in 2008 and into 2009. The originators believe that this has resulted in a reduction in delinquencies through the second half of 2009 which has continued through 2010 and into 2011.

In 2012, Lloyds Banking Group changed its charge off policy for accounts in financial difficulty where the account holder does not meet the criteria to enter a temporary reduced repayment plan. The charge off of these accounts has been accelerated to 120 days in arrears from the standard 180 days charge off policy. This has resulted in a drop in the level of delinquencies at 120 to 180 days and thus total 30+ days delinquencies.

In 2013 and into the first half of 2014 delinquencies continued to improve. A combination of the established accelerated charge off policy, robust selection criteria and the seasonal impact in July 2013 of £683 million, June 2014 £593 million and November 2014 £636 million of Principal Receivables resulted in lower delinquencies across all vintage years.

Principal payment rate for a performance period is calculated as Principal Collections received from cardholders during the performance period divided by Principal Receivables at the beginning of the performance period.

For the Bank of Scotland portfolio, pre-2004 account originations typically received higher spending rewards and attracted a higher percentage of convenience users. As a result, payment rates for this segment tend to be stronger for the pre-2004 vintage. From 2005 onwards, Bank of Scotland products have typically targeted the borrower population with more attractive lower introductory APRs instead of rewards. This strategy has reduced the average payment rate on Bank of Scotland's credit card receivables originated since 2005.

In July 2007, Lloyds launched the Airmiles Duo card, taking over the Airmiles relationship from NatWest. This product rewards credit card spend with Airmiles, and attracts a higher proportion of convenience users who pay down their balance in full each month. Payment rates for this product on the Lloyds portfolio increased not only for originations from 2007, but also for the pre-2007 vintages as some existing customers switched to the new product and changed their spending and payment behaviours to

benefit from the Airmiles rewards. Payment rates have increased across all origination years from November 2010 following the initial addition of £2.9 billion of Lloyds Receivables to the Penarth Receivables Trust and have continued to increase as the quality of the portfolio has improved (including throughout 2014 and into 2015).

- (ii) It understands that (a) the notes have been offered only in a transaction not involving any public offering in the United States within the meaning of the Securities Act, (b) the notes have not been and will not be registered under the Securities Act or with any securities regulatory authority of any state or other jurisdiction of the United States, and (c) if in the future it decides to offer, resell, pledge or otherwise transfer the notes, such notes may be offered, resold, pledged or otherwise transferred only in accordance with the provisions of the Note Trust Deed and the legend on such notes. It acknowledges that no representation is made as to the availability of any exemption under the Securities Act or any state securities laws for resale of the notes.
- (iii) In connection with the purchase of the notes: (a) the Issuer is not acting as a fiduciary or financial or investment advisor for it; (b) it is not relying (for purposes of making any investment decision or otherwise) upon any advice, counsel or representations (whether written or oral) of the Issuer or the Dealer (in its capacity as such) or any of their agents, other than any statements in a current prospectus for such notes and any representations expressly set forth in a written agreement with such party; (c) it has consulted with its own legal, regulatory, tax, business, investment, financial and accounting advisors to the extent it has deemed necessary and has made its own investment decisions based upon its own judgment and upon any advice from such

advisors as it has deemed necessary and not upon any view expressed by the Issuer or the Dealer; (d) its purchase of the notes will comply with all applicable laws in any jurisdiction in which it resides or is located; (e) it is acquiring the notes as principal solely for its own account for investment and not with a view to the resale, distribution or other disposition thereof in violation of the Securities Act; and (f) it is a sophisticated investor and is purchasing the notes with a full understanding of all of the terms, conditions and risks thereof and is capable of assuming and willing to assume those risks.

- (iv) Either: (i) it is not, and for so long as it holds a debt note will not be, (A) an "employee benefit plan" subject to Title I of the U.S. Employee Retirement Income Security Act of 1974, as amended ("**ERISA**"), (B) a "plan" subject to Section 4975 of the U.S. Internal Revenue Code of 1986, as amended (the "**Code**"), (C) any person or entity whose underlying assets include, or are deemed for purposes of ERISA or the Code to include, the assets of any such "employee benefit plan" or "plan" by reason of 29 C.F.R. 2510.3-101 (as modified by Section 3(42) of ERISA), or otherwise or (D) any other employee benefit plan subject to any U.S. federal, state, local or non-U.S. law that is substantially similar to Section 406 of ERISA or Section 4975 of the Code ("**Similar Law**"), and is not purchasing such debt note on behalf of any such person, or (ii) the purchase, holding and subsequent disposition of such debt note will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code (or, in the case of any such other employee benefit plan, is not in violation of any such Similar Law).
- (v) It understands that an investment in the notes involves certain risks, including the risk of loss of all or a substantial part of its investment under certain circumstances. It has had access to such financial and other information concerning the Issuer and the notes, as it deemed necessary or appropriate in order to make an informed investment decision with respect to its acquisition of the notes, including an opportunity to ask questions of and request information from the Issuer. It understands that the notes will be highly illiquid and are not suitable for short term trading. It understands that it is possible that due to the structure of the transaction and the performance of the Securitised Portfolio, payments on the notes may be deferred, reduced or eliminated entirely. The Issuer has assets limited to the Security (as defined in the STDCMA) for payment of the notes.
- (vi) It acknowledges that it is its intent and that it understands it is the Issuer's intent, that for purposes of U.S. federal, state and local income taxes, the Issuer will be treated as a corporation and the notes will be treated as indebtedness of the Issuer; it agrees to such treatment, to report all income (or loss) in accordance with such treatment and to take no action inconsistent with such treatment, except as otherwise required by any taxing authority under applicable law.
- (vii) It is aware that, except as otherwise provided in the Note Trust Deed, the notes being sold to it will be represented by one or more Global Note Certificates, and that beneficial interests therein may be held only through Euroclear and Clearstream or DTC or one of their nominees, as applicable.
- (viii) It understands that the Issuer, the Note Trustee, the Dealers and their counsel will rely on the accuracy and truth of the foregoing representation, and it hereby consents to such reliance.

- (ii) If it is not a "United States person" as defined in Section 7701(a)(30) of the Code, it is not acquiring any Note as part of a plan to reduce, avoid or evade U.S. federal income taxes owed, owing or potentially owed or owing.
