DESCRIPTION OF THE A1 SWAP AGREEMENT

The Issuer will enter into a currency swap transaction pursuant to an ISDA master agreement and related schedules dated 19 April 2016 (together, the "**A1 Swap Agreement**") with Wells Fargo Bank, N.A., London Branch (the "**Swap Counterparty**"). For further detail, please see "*Description of the Swap Agreements*" in the Base Prospectus.

Early termination

The A1 Swap Agreement may be terminated early, *inter alia*, in the following circumstances:

- (a) at the option of one party, if there is a failure by the other party to pay any amounts due under the A1 Swap Agreement;
- (b) by the Swap Counterparty upon the service of an Enforcement Notice following the occurrence of an Event of Default under the Conditions;
- (c) upon the occurrence of certain other events, including but not limited to amendments being made to certain documents (such as the Note Trust Deed Supplement in relation to Series 2016-1 A1) without the Swap Counterparty's consent, certain insolvency events or changes in law resulting in illegality; and
- (d) in the event that there is a withholding tax imposed (1) in relation to the Issuer's payments under the A1 Swap Agreement, or (2) in relation to the Swap Counterparty's payments under the A1 Swap Agreement and, as a result, the Swap Counterparty is required to pay more or receives less under the A1 Swap Agreement (following, broadly, expiry of any period during which the Swap Counterparty is required to mitigate against the imposition of such withholding tax).

Upon any such early termination of the A1 Swap Agreement, the Issuer or the Swap Counterparty may be liable to make a termination payment to the other. The amount of any such termination payment will be based on the market value of the swap computed in accordance with the A1 Swap Agreement, generally on the basis of market quotations of the cost of entering into a replacement swap transaction with the same terms and conditions that would have the effect of preserving the respective full payment obligations of the parties, in accordance with the procedures set forth in the A1 Swap Agreement. Any such termination payment could, if interest rates and/or the relevant exchange rate have changed significantly, be substantial.

Upon termination of the A1 Swap Agreement, if no replacement Swap Agreement is entered into, the security under the Note Trust Deed (and the supplement to the Note Trust Deed) in respect of the Series 2016-1 A1 Notes may become enforceable. If such security is enforced, the proceeds thereof will be applied in payment of amounts under the order of post-enforcement priority of payments set forth in the Conditions of such note. In the event that the A1 Swap Agreement is terminated not as a result of a Counterparty Swap Event Of Default (as defined below), then any termination payment to be paid to the Swap Counterparty by the Issuer in accordance with the early termination provisions of such A1 Swap Agreement shall rank simultaneously and equally with payments to be made under the Series 2016-1 A1 Notes.

Certain events including, without limitation, failure to pay or deliver, misrepresentation, insolvency or bankruptcy pertaining to the Swap Counterparty (a "**Counterparty Swap Event Of Default**") may result in the early termination of the A1 Swap Agreement. In the event that the A1 Swap Agreement is terminated as a result of a Counterparty Swap Event Of Default, then any termination payment to be paid to the Swap Counterparty by the Issuer in accordance with the early termination provisions of such A1 Swap Agreement shall be subordinated to any payments to be made under the Series 2016-1 A1 Notes.

Taxation

The Issuer is not obliged under the A1 Swap Agreement to gross up payments made by it if a withholding or deduction for, or on account of, taxes is imposed on payments made under the A1 Swap Agreement.

The Swap Counterparty will generally be obliged to gross up payments made by it to the Issuer if a withholding or deduction for, or on account of, certain taxes is imposed on payments made by the Swap Counterparty under the A1 Swap Agreement. However, if the Swap Counterparty is required to gross up

a payment under the A1 Swap Agreement due to a change in the law, the Swap Counterparty may terminate the A1 Swap Agreement.

Rating downgrade or withdrawal of the Swap Counterparty

If the Swap Counterparty (or, if applicable, its guarantor or credit support provider) ceases to have, does not have or is not guaranteed by an institution which has (as the case may be) the Minimum Required Ratings (in accordance with the requirements of Standard & Poor's, Fitch Ratings or Moody's), or if the rating of a Swap Counterparty (or, if applicable, its guarantor or credit support provider) is withdrawn, then the Swap Counterparty will, in accordance with the provisions of and subject to the timeframes specified in the A1 Swap Agreement, be required to take certain remedial measures which may include:

- (i) providing collateral in accordance with a mark-to-market collateral agreement between the Swap Counterparty and the Issuer (the "**Credit Support Annex**");
- (ii) obtaining a guarantee from a guarantor that satisfies the minimum rating and other requirements specified in the A1 Swap Agreement;
- (iii) transferring the A1 Swap Agreement to an entity that satisfies the minimum rating and other requirements specified in the A1 Swap Agreement; or
- (iv) taking such other actions as may be specified in the A1 Swap Agreement.

If the Swap Counterparty fails to take any of the applicable remedial measures in accordance with the provisions of the A1 Swap Agreement, the Issuer may terminate such A1 Swap Agreement in accordance with its terms.

"Minimum Required Ratings" means:

- (a) a short term issuer default rating of at least F1 from Fitch Ratings and a short term rating of at least A-1 by Standard and Poor's; and
- (b) a long term issuer default rating of at least A by Fitch Ratings and a long term, unsecured and unsubordinated debt or counterparty obligations rating of at least A3 by Moody's and a long term unsecured, unsubordinated and unguaranteed debt obligations rating of at least A by Standard and Poor's, depending, in each case, on the rating of the relevant notes, and, in the case of ratings from Standard and Poor's, on the replacement option selected,

or such other minimum required ratings as may be specified in the A1 Swap Agreement.

General

Except as permitted under the A1 Swap Agreements neither the Issuer nor the Swap Counterparty is, save for the assignment by way of security in favour of the Note Trustee under the supplement to the Note Trust Deed, permitted to assign, novate or transfer as a whole or in part any of its rights, obligations or interests under the A1 Swap Agreements.

Collections of Receivables included in Penarth Receivables Trust will be on a cash basis and may not reflect the historical yield experience shown in the following tables. For further detail, please see page 177 of the Base Prospectus. Historical yield experience of the Bank Portfolio may not be indicative of future performance of the Bank Portfolio or the Securitised Portfolio.

STATIC POOL DATA

The following tables present yield, net charge off, delinquencies, principal payment rate, total payment rate, Principal Receivables balance and total Receivables balance for Receivables included in the Securitised Portfolio since the incorporation of the Penarth Receivables Trust in October 2008. In each case, the information is organised by calendar year of account origination ("**Year of Account Origination**") for each monthly period.

The data up to October 2010 relates to Receivables originated by Bank of Scotland only. In November 2010, £2.9 billion of Receivables originated by Lloyds Bank were added to the Penarth Receivables Trust, and data from November 2010 reflects the combined Bank of Scotland and Lloyds Bank Receivables in the Penarth Receivables Trust.

Yield from finance charges and fees includes interest income, late fees, forex fees, credit insurance, card protection insurance, overlimit fees, cash advance fees, ATM fees, balance transfer fees and other fees related to credit cards. The yield percentage for each monthly period is calculated by dividing the sum of finance charges, fees and interchange during each monthly period by the Principal Receivables balance as of the beginning of the monthly period, then annualised by dividing the result by the number of days in each monthly period and multiplying by the number of days in the calendar year.

Volatility in the yield percentage is driven primarily by variations in the number of collection days during the performance period; the more collection days there are, the higher the value of payments received, and the higher the reported yield.

Pre-2004 the operating environment in the UK for credit cards issuers was less competitive, and Lloyds Banking Group's acquisition strategy for the Lloyds portfolio had initial APRs at account origination which were typically higher; accordingly, the pre-2004 vintages have a slightly higher yield compared with the post-2004 vintages. The originators believe that the differential margin in yield compared to post-2004 vintages is reducing as Lloyds Banking Group's risk-based re-pricing strategy across the portfolio results in the convergence of yield over time.

In July 2007, Lloyds launched the Airmiles Duo card, taking over the Airmiles relationship from National Westminster Bank plc ("NatWest"). This product rewards credit card spend with Airmiles, and attracts a higher proportion of convenience users who are less likely to revolve a balance on an account and attract

interest charges. Yield on the Lloyds originated accounts from 2007 is therefore lower than accounts originated in years prior to 2007.

Following the initial addition of £2.9 billion of Lloyds Receivables to the Penarth Receivables Trust in November 2010, overall yield for the Penarth Receivables Trust has increased, driven by higher payment rates and so have the Finance Charge Collections on the Lloyds portfolio relative to the Bank of Scotland portfolio.

Yield on accounts acquired since 2010 is lower than for previous years as a result of an improvement in the quality of new accounts acquired in these years compared to previous years. This is driven by a combination of management actions to improve underwriting, a higher concentration of full payers acquired on the reward products offered by Lloyds, and a general improvement in the macro environment.

Net losses for a performance period is calculated as Principal Receivables charged off during the performance period less recoveries received on previously charged off accounts during the performance period, all divided by the Principal Receivables balance as of the beginning of the performance period, then annualised by dividing the result by the number of days in the performance period and multiplying by the number of days in the calendar year.

Net losses during 2008 and the first few months of 2009 are lower due to the initial selection criteria for new Receivables added to the Penarth Receivables Trust which excluded accounts in the later stages of delinquency. This seasoning impact is evident in November 2010 when £2.9 billion of Lloyds Receivables were added to the Penarth Receivables Trust resulting in reduced net losses; the originators expect net losses to continue to improve in the short term as risk selection criteria remains robust.

The higher charge offs on accounts originated pre-2004 is due to Bank of Scotland originating accounts above-market volumes during 2002 and 2003 in line with Bank of Scotland's market growth strategy at the time. Since 2004, acquisition and underwriting strategies have been reviewed and substantially revised. In accordance with this revised strategy, Lloyds Banking Group has taken significant steps to reduce its acquisition of accounts, and exposure to existing accounts, in the higher risk segments of the credit cards market.

In 2008 during the economic market dislocation, there was an industry-wide deterioration in the quality of business acquired. Lloyds Banking Group undertook significant de-risking in response, with tighter cut-offs reducing volume and lower initial credit lines. This activity was undertaken in the second half of 2008 and into 2009. The originators believe that this has resulted in a significant improvement in the credit quality of accounts originated in since 2009.

Net charge offs in August 2013, January 2014, May 2014, July 2014, August 2014, May 2015, July 2015 and December 2015 are negative for some vintages and below trend for others. This is due to the sale of previously charged off accounts to a third party whereby the proceeds from the sale were recorded as recoveries in the month.

Delinquencies include both Principal Receivables and Finance Charge Receivables. The 30+ days delinquency percentage for a performance period is calculated as total receivables 30 days or more past due divided by total Principal Receivables and Finance Charge Receivables as of the last day of the performance period.

Delinquencies during 2008 and the first few months of 2009 are lower due to the initial selection criteria for new Receivables added to the Penarth Receivables Trust which excluded accounts in the later stages of delinquency. This seasoning impact is evident in November 2010 when £2.9 billion of Lloyds Receivables were added to the Penarth Receivables Trust resulting in reduced net losses; the originators expect net losses to continue to improve in the short term as risk selection criteria remains robust.

In 2008 in response to the deteriorating economic environment, Lloyds Banking Group undertook significant de-risking of its portfolio, with credit lines of higher risk customers reduced and tighter cut-offs and lower initial credit lines improving the quality of new account acquisitions. This activity was undertaken in 2008 and into 2009. The originators believe that this has resulted in a reduction in delinquencies through the second half of 2009 which has continued through 2010 and into 2011.

In 2012 Lloyds Banking Group changed its charge off policy for accounts in financial difficulty where the account holder does not meet the criteria to enter a temporary reduced repayment plan. The charge off of these accounts has been accelerated to 120 days in arrears from the standard 180 days charge off policy. This has resulted in a drop in the level of delinquencies at 120 to 180 days and thus total 30+ days delinquencies.

In 2013 and into the first half of 2014 delinquencies continued to improve. A combination of the established accelerated charge off policy, robust selection criteria and the seasonal impact in July 2013 of £683 million, June 2014 £593 million, November 2014 £636 million, June 2015 £660 million and November 2015 £693 million of Principal Receivables added to the Trust resulting in lower delinquencies across all vintage years.

Principal payment rate for a performance period is calculated as Principal Collections received from cardholders during the performance period divided by Principal Receivables at the beginning of the performance period.

For the Bank of Scotland portfolio, pre-2004 account originations typically received higher spending rewards and attracted a higher percentage of convenience users. As a result, payment rates for this segment tend to be stronger for the pre-2004 vintage. From 2005 onwards, Bank of Scotland products have typically targeted the borrower population with more attractive lower introductory APRs instead of rewards. This strategy has reduced the average payment rate on Bank of Scotland's credit card receivables originated since 2005.

In July 2007, Lloyds launched the Airmiles Duo card, taking over the Airmiles relationship from NatWest. This product rewards credit card spend with Airmiles, and attracts a higher proportion of convenience users who pay down their balance in full each month. Payment rates for this product on the Lloyds portfolio increased not only for originations from 2007, but also for the pre-2007 vintages as some existing customers switched to the new product and changed their spending and payment behaviours to benefit from the Airmiles rewards.

Payment rates have increased across all origination years from November 2010 following the initial addition of £2.9 billion of Lloyds Receivables to the Penarth Receivables Trust and have continued to increase as the quality of the portfolio has improved (including throughout 2014 and into 2015).

Distribution of this Drawdown Prospectus and the Base Prospectus or disclosure of any of their contents to any person other than the Offeree and those persons, if any, retained to advise the Offeree with respect thereto and other persons meeting the requirements of Rule 144A or Regulation S is unauthorised and any disclosure of any of their contents, without the prior written consent of the Issuer, is prohibited.
