The following tables show information relating to the historic performance of Eligible Accounts originated using Bank of Scotland's underwriting criteria. As mentioned in the Base Prospectus, a member of the Lloyds Banking Group may accede to the RSD as an Additional Transferor subject to certain conditions being satisfied. Data as of 31 March 2010 in respect of the current credit cards portfolio of Lloyds TSB Bank plc is available at http://www.lloydsbankinggroup.com/investors/debt_investors.asp.

Receivable Yield Considerations

The following table sets forth the gross revenues from finance charges and fees billed to Accounts in the Bank Portfolio for each of the years ended 31 December 2005, 2006, 2007, 2008 and 2009, and for the 3 months ended 31 March 2010. These revenues vary for each account based on the type and volume of activity for each account. The historical yield figures in these tables are calculated on an accrual basis. Collections of Receivables included in Penarth Receivables Trust will be on a cash basis and may not reflect the historical yield experience in the table. For further detail, please see the Base Prospectus.

Performance By Vintage

The 2002/03 vintages experienced above average delinquencies and charge-offs relative to the total portfolio following higher recruitment of above market volumes, in line with the market growth strategy at the time. Since then BOS's acquisition underwriting strategies have undergone a complete overhaul and BOS has taken significant steps to reduce its exposure to these vintages by reducing open to buy on the higher risk segments.

In 2003 the Internet channel was launched and since then it has become an increasingly larger proportion of total acquisition year on year (45 per cent. in 2009).

Prior to 2004 BOS offered 3 standard products: a flat rate card, a cashback card and a teaser card with a promotion period of up to 6 months. The UK cards market was less competitive at this time, and initial APRs at the point of recruitment were typically higher; these vintages have a slightly higher yield. The differential margin compared to later vintages is reducing as BOS's risk based re-pricing strategy across the portfolio results in converging yield over time.

BOS launched The One Card in 2004, a market leading product with a strong introductory offer, lower APR and cashback reward. As a result, the volume of accounts acquired increased significantly; the quality of this vintage is above average. The reward proposition attracted a strong concentration of convenience users with a higher than average payment rate.

Pre 2005 vintages typically with richer rewards attracted a higher percentage of convenience users. As a result the payment rates on these vintages are stronger. From 2005 onwards BOS products have typically targeted the borrower population with rewards replaced by more attractive lower introductory period APRs. This has reduced the average payment rate on card accounts acquired since then.

Since 2007 BOS has increased the range of products, moving to a more targeted acquisition strategy with different pricing across acquisition channels and customer segments.

In 2008 during the economic market dislocation, there was an industry-wide deterioration in the quality of business acquired. BOS undertook significant de-risking in response, with tighter cut-offs reducing volume and lower initial credit lines. This activity was undertaken during the second half of 2008 and into 2009. This has resulted in an improvement in the quality of the 2009 and 2010 vintages relative to the 2008 vintage.
