

UCC Search Services

Featuring the largest industry database

The first line of defense in responsible risk management is an accurate UCC search. But in order to improve accuracy, it's imperative to use a reliable system that reduces mistakes, offers state-by-state jurisdictional search ability, and provides the most complete results available.

Many systems make it difficult to juggle each jurisdiction's search requirements, while others raise the risk of inaccurate or incomplete searches. These issues lead to mistakes, often resulting in the loss of priority, which can be just as bad as having an unperfected security interest.

UCC Search Services from CSC solves all these issues while making it easier for clients, who need only learn one system to search in all jurisdictions. The CSC Search Logic tool, which picks up a broader range of name variations and indexing errors, reduces risk while saving time and money by producing more reliable results the first time.

Additionally, our proprietary Keyword Search Logic, combined with the industry's largest, most current database of UCC information and images, helps our clients find more records in faster time than anyone else in the industry. With CSC, you'll get the most complete and accurate search results available in the industry.

Our UCC Search Service makes it easy to:

- Reduce risk by understanding the whole picture
- Tap into the industry's largest in-house repository of online UCC information and images to find records faster
- Use CSC Keyword Search Logic to find DBAs, misspellings, and other name variations that other search engines commonly miss
- Avoid duplicate searches by checking your online search history first
- Reduce the time it takes to close your loans
- Save time and money by getting your search done right, the first time
